Consulting Services

Custom Research and Consulting Services

For 14 years INPUT has provided objective and proprietary analysis of clients' problems and opportunities. These projects are based on INPUT's extensive data base of market and vendor information plus effective data gathered by primary research.

Data are analyzed by professionals who know the dynamics of clients' situations. From the data and analysis, INPUT develops recommendations for client action.

About INPUT

INPUT provides planning information, analysis, and recommendations to managers and executives in the information processing industries. Through market research, technology forecasting, and competitive analysis, INPUT supports client management in making informed decisions.

Continuous-information advisory services, proprietary research/consulting, merger/acquisition assistance, and multiclient studies are provided to users and vendors of information systems and services (software, processing services, turnkey systems, systems integration, professional services, communications, systems/software maintenance and support).

Many of INPUT's professional staff members have more than 20 years' experience in their areas of specialization. Most have held senior management positions in operations, marketing, or planning. This expertise enables INPUT to supply practical solutions to complex business problems.

Formed as a privately held corporation in 1974, INPUT has become a leading international research and consulting firm. Clients include more than 100 of the world's largest and most technically advanced companies.
