IX AWARDS AND DELETIONS

- o Since the initial design of the PAR, the cumulative number of federal information technology programs covered by INPUT has grown each fiscal year.
 - By May 1986, INPUT had investigated over 900 programs.
 - The number of active, funded programs, however, varies from year to year.
 - Agencies introduce new initiatives.
 - Contracts are awarded for existing programs.
 - Agencies revise or withdraw previous initiatives.
- o The primary focus of the PAR is federal information technology contracting opportunities, not program history.
- o Information about contract awards and program deletions supplements understanding of current opportunities.
 - Award information identifies potential competitors and incumbents.
 - Identification of deleted programs reduces the number of false leads which might be pursued by contractors.

- o To consolidate award and deletion information of interest to clients, INPUT devised program lists to replace discontinued program descriptions. The lists include:
 - Award information.
 - Winner(s).
 - Total contract value.
 - Contract duration.
 - Contract number.
 - Type of contract.
 - Systems and services actually acquired.
 - Reasons for program deletion.
 - Mission or need no longer existed.
 - Loss of funding authority.
 - Merged with or split between other programs.
 - Agency decided to use in-house resources.
- o The award and deletion information is organized in Section IX of the PAR as follows.
 - A. Awards.
 - 1. Index.

2. Information Pending List (awarded programs for which complete contract information is not yet available).
 3. Contract Award Descriptions.
- B. Deletions.
1. Index.
 2. Deleted Program Descriptions.
- o Both awards and deletions are ordered in a sequence similar to the PAR program descriptions.
 - Indexes list all programs in PAR agency sequence.
 - New releases of contract awards and program deletions are added to the end of the respective subsections.
 - Within each new release, programs are ordered by agency and PAR page number.
 - o When multiple contract programs have been partially awarded, the program descriptions are both retained in the PAR agency section and listed in the awards section. The same practice applies to services contracts which are recomputed periodically.
