

# **Vertical Markets Banking and Finance**

---

R. Dennis Wayson  
INPUT Consultant and  
President of RDW Associates

# Banking & Finance

## Vertical Market Breakout

INPUT

# Session Overview

# Banking & Finance Industry Trends & IS Markets

INPUT

# Overview

- Business Trends
- Industry Driving Forces
- Information Systems Technology
- Information Services Markets
- Competitive Environment
- Conclusions

INPUT

# Business Trends

- Modest economic recovery
- Rolling real estate recession
- Waning junk bond debt
- Restructuring of third world debt
- Global competition in banking
- The “virtual corporation”

INPUT

## Industry Driving Forces

- Industry demographics - consolidation
- Growing profitability
- Liberalization of product/service possibilities
- Securitization
- Growing competition - Nonbank financial services firms

INPUT

# Consolidation - Asset Concentration

Commercial Bank Offices  
(000's)

- Growing ratio of branches to headquarters
- Growing concentration of assets

*"In 1993 the top 300 institutions held 65% of all deposits."*

INPUT

# Growing Profitability

- Lower interest rates
- Gradual economic upturn

Reduced corporate and  
bank borrowing costs

- Bankruptcies averted
- Bank failures reduced
- FDIC pool grows rapidly
- RTC portfolio grows in value

- Earnings increase
- Capital grows

INPUT

# Competition - Threats & Opportunities

## Competition Provides Threats

- Non-traditional funding sources
- Alternative deposit agencies
- Credit card competitors

## Deregulation Presents Opportunities

- Insurance
- Brokerage
- Mutual Funds

INPUT

# Information Systems

- Global Information Systems Issues
- Impact of New Technologies
- Internal Information Systems Strategies

INPUT

# Global Information Systems Issues

- Reengineering
- Outsourcing
- Data center consolidation
- Downsizing
- Open systems/networking

INPUT

## Key Technologies - Banking & Finance

- Relational DBMSs
- Imaging
- Expert Systems
- UNIX
- Workstations
- Tools
- C/S Architecture

INPUT

# Key Technologies - Relational DBMSs

- Heterogeneous platform support
- Improved transaction logging
- Disaster recovery capabilities
- New development tools

*Linking Mainframes  
And PCs*

Client/Server  
Solutions

- Applications software
- Reduced workstation costs
- LAN/WAN communications
- Rich PC functionality

INPUT

## Key Technologies - Imaging

Distributed "File Folder"  
Imaging Applications

INPUT

## Banking & Finance Target Platforms - Planned Applications

INPUT

# Internal Information Systems Strategies

- Cope with budgets and cost controls
- Evaluate outsourcing alternatives
- Integrate merged bank systems
- Upgrade disaster recovery
- Implement RDBMSs
- Support relationship banking
- Explore imaging
- Research other information technologies

INPUT

# Information Services Markets

## Banking and Finance

- Total IS Spending
- Expenditures by Product/Service Market
- Driving Forces for Growth

INPUT

## Banking & Finance Growth in IS Expenditures

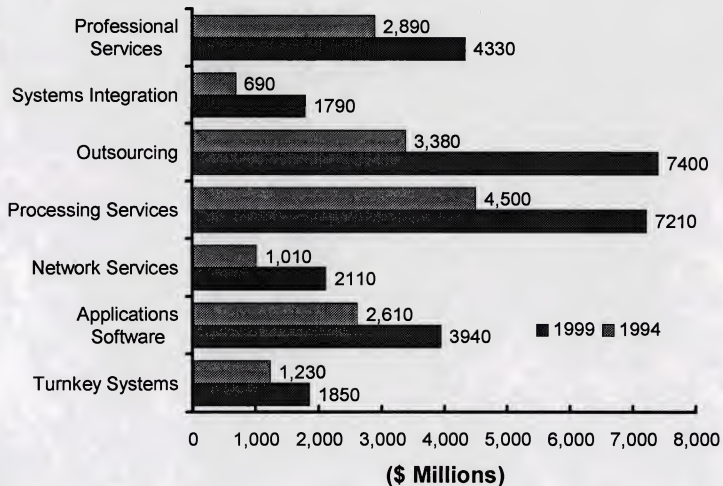

INPUT

# Banking & Finance

## User Expenditures by Product/Service Market

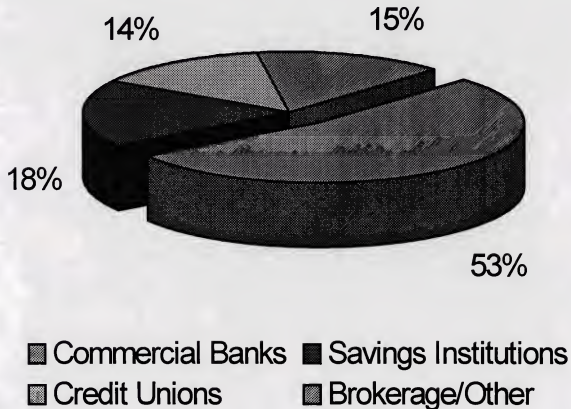

INPUT

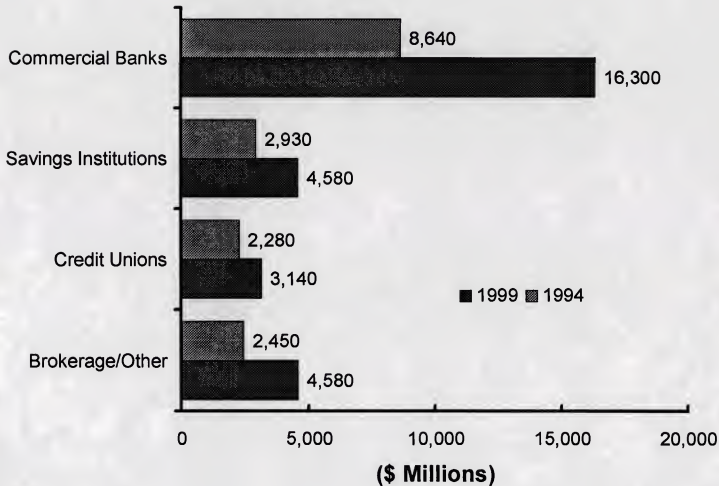

## Financial Services Industry Segments Proportion of IS Expenditures -1994

INPUT

## Banking & Finance Industry Segment Markets

INPUT

# Commercial Banks Dominate

- Highest CAGR - 14%
- 53% of total expenditures - 1994
- 57% of total expenditures - 1999
- Coupled with S&L's equal 71% of market

INPUT

## Banking & Finance Growth Rates by Product/Service Market

# Driving Forces For Growth by Product/Service Market - Banking & Finance

P/S Market	Key Forces for Changes	CAGR* (%)    ↑↓
Systems Integration	Pent-up demand, consolidations & mergers, C/S	21    ↑
Outsourcing	Low profitability - regulatory reserve requirements for higher capital ratios	17    ↑↓
Network Services	Credit card volumes, growing ATM usage	16    ↑
Processing Services	Economies of scale for transaction pricing, but some dampening due to mergers/consolidations	10    ↑

\* Arrows indicate increase/decrease over 1993 forecasted CAGR

INPUT

# Driving Forces For Growth by Product/Service Market - Banking & Finance

P/S Market	Key Forces for Changes	CAGR* (%) ↑↓
Applications Software	Consolidations reduce market, but growth in PC software dampens potential negative effects	9 ↓
Professional Services	Cost control reduces traditional strong demand for contract professional services & consultants	8 ↑↓
Turnkey Systems	Both minicomputer and emerging PC based systems offer alternatives to processing services	8 ↓

\* Arrows indicate increase/decrease over 1993 forecasted CAGR

INPUT

# Recap of Market Influences - Banking & Finance

## Industry Issues

- Cost Control
- Overcapacity & Mergers
- Gradual Economic Recovery
- Non-Bank Institutions

## Increasing Growth

- Systems Integration
- Outsourcing
- Network Services
- Processing Services

## Mediocre Growth

- Professional Services
- Applications Software
- Turnkey Systems

INPUT

## Competitive Environment

- Larger institutions still mainframe dependent
- Smaller institutions moving toward PC based systems
- Growing electronic interaction between customers and banks
- Management is looking for a measurable return on IS investments
- Banking sector remains dominated by largest institutions with 65% of deposits controlled by 2.5% of the banks

INPUT

## Fragmented Market for Vendors

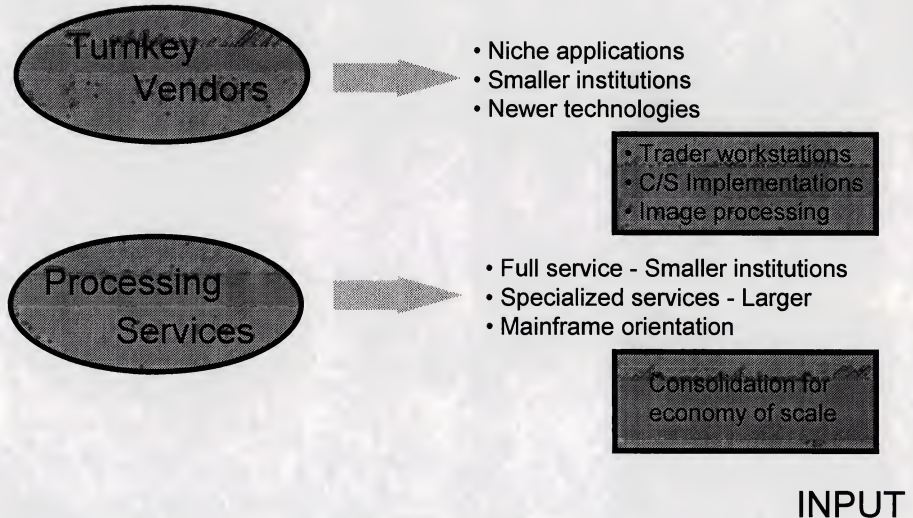

*But patterns of service exist*

INPUT

# Service Offering Patterns

# Service Offering Patterns

Software  
PS Vendors

- All sizes of vendors
- Small vendors - niche
- Large vendors - broad based

Purchased by banking  
and finance firms of all  
sizes

Integrators  
Outsourcers

- Focused on larger institutions
- Generally are larger vendors
- Mainframe orientation

Migration to C/S will  
drive both markets

INPUT

## IS Market Share - Banking & Finance

Company	Market Share (Percent)
IBM	7
EDS	6
First Data Corporation	5
Systematics	3
Fiserv	3
ADP	3
Andersen Consulting	3
Dow Jones	2
DST Systems	2
Unisys	2

INPUT

## Summary - IS Competition

- Competition fierce for large institution dollars
- Good opportunities for both large and small vendors
- Integrators and outsourcers will see the biggest opportunities in the immediate future. Driven by:
  - Migration to C/S technology
  - On-going consolidation within the industry
- Maturation of new technologies will increase demand for vendors in all product/service markets

INPUT

# Conclusions

The industry is sound and will see new growth

C/S will increase demand for outside software/services

Large vendors will benefit from globalization

The "virtual corporation" concept will benefit vendors

Niche markets will continue to flourish

INPUT

# **R. DENNIS WAYSON**

## **INPUT CONSULTANT**

### **PRESIDENT OF RDW ASSOCIATES**

---

#### **PROFILE**

##### **CAPABILITIES**

- Analysis and consulting on the management of information systems; including process, organizational and technology issues, as well as information systems planning.
- Consulting and analysis of outsourcing alternatives, contracts and bargaining strategies.
- Strategy, market and competitive analysis for information services vendors.
- Consulting on business and product/offering strategies in the information services industry.

##### **BACKGROUND**

Prior to founding his own practice, Mr. Wayson served as the Vice President of U.S. operations for INPUT, a leading market research and consulting firm, focused on the information services industry. In that role he led significant custom research and consulting projects in support of INPUT's key clients. He also managed multi-client studies and a significant portion of INPUT's program research. Mr. Wayson brings his clients more than 20 years of experience in the management and planning of information systems. His experience includes executive positions in the management of systems development data processing operations, and office systems. As a Senior Vice President at the Bank of America his responsibilities included the management of user based systems on a worldwide basis. In his previous position as Director of Information Systems Development and Technology at Sun Company, Inc., Denny had responsibility for corporate-wide technology planning, corporate systems development and the systems planning process.

In addition to presentations to clients and their customers, Denny has served as a guest speaker at numerous conferences, seminars and educational institutions. Engagements include the Center for Software Development (Japan), ITAA, the IBM European Education Center, MIT, University of California, the University of Pennsylvania, the Andersen Consulting CIO Conference and the IBM National Conference on Office Systems. In addition, he has served as a member of the board of the Center for Information Systems Research at MIT.

##### **EDUCATION**

- Master's Degree in Operations Research and Computer Science from Cornell University
- Bachelor of Science in Engineering from Lehigh University
- Certificate M.B.A. from Columbia University Executive Program in Business Administration

620 Kite Hill Road  
Orinda, CA 94563  
510-254-1794
