Introduction

A

Objectives and Scope

INPUT WAS commissioned to conduct a field research project to establish an independent benchmark of professional services pricing data for National Westminster Bank. The information is to be used to monitor the rates for the billing of a software development project under contract for the upgrade of the Advances Management Information Database (AMID).

Originally, six companies were considered as possible benchmarking candidates to perform the AMID upgrade. Of these, one was discounted because the company was only able to offer professional services allied to their proprietary system. A further two were discounted on the grounds of insufficient relational database expertise.

With the agreement of National Westminster Bank, the study has therefore been restricted to a sample of three professional services companies who are perceived by INPUT to be of sufficient caliber to undertake work of this kind. These are namely:

- CMG
- Cap Gemini Sogeti
- Logica

To maintain a request for confidentiality on behalf of the above companies, INPUT has produced a second report to be issued to PA Consulting, referring to these organisations as X, Y and Z only.

B

Methodology and Definitions

The first stage of the research project was the definition of the tasks being run by P.A. Consulting for the National Westminster Bank. This information is incorporated into Appendix A.

The choice of firms was limited to those capable of meeting the technical criteria supplied by Natwest and set out in Appendix B. Implicit was an awareness of the need for a consulting component in this exercise.

In order to provide a more realistic assessment, as part of the second stage, each company was invited to submit rates pertaining to a job specification supplied by Natwest, which included the duration of the project (143 days), together with the number of days to be allocated to each staff level.

Using BCS classifications, INPUT then matched as closely as possible the professional services rates being quoted by competitive firms for their various staff grades with those defined by the given staff grades/descriptions.

From this information, a set of fee rate tables were prepared for each of the following staff positions:

- Project Leader (PL)
- Project Consultant (PC)
- Development Team Leader (TL1)
- Team Leader Back End (TL2)
- Team Leader Testing (TL4)
- Architect/Designer Back End (AP1)
- Architect Designer Front End (AP2)

- Analyst Programmer Back End (AP1) and (AP2)
- Analyst Programmer Front End (AP3)
- Tester (AP4).

Actual fee rate responses are incorporated into Appendix C and a normalised set of rates are incorporated in Section II-B. As Cap Gemini Sogeti provided list rates for this exercise, INPUT has assumed a 20% discount to these rates.

C

Report Organisation

Chapter II contains daily fee rate tables for each of the management consultants surveyed in this report. As several different staff grades attracted the same day rates, these tables are split into six bands only.

A second set of tables is provided on a company by company basis which itemises total rates for the 140 day project.

Vendor Pricing Structures

Section II-A of this chapter provides daily fee rate tables for the competitive firms, with bands ascribing to BCS codes noted as appropriate. Given that the same day rates pertained to several staff levels, these have been grouped accordingly.

Section II-B provides normalised totals of contract rates submitted by respective competitive companies.

A**Daily Fee Rates Matched to AMID Personnel Groups**

Exhibit II-1 provides a table of software developers' day rates matched to the staff levels being provided by PA Consulting.

Exhibit II-1**Competitors' Daily Fee Rates (£)**

PA Consulting Job Category	Code	BCS Level	CMG	Cap Gemini	Logica

Appendix A

AMID Job Categories

The abbreviations shown after the position are used to identify the resources both in this document and in the Project plan.

Each position shows the following:

- required skill-set for the role including a guide to a BCS ISM3 grading for the job
- additional skills where needed for specific resources
- the specific skills to be used for those tasks.

Position: **PROJECT LEADER (PL)**

Skill-Set: 10+ Years IT experience
 Minimum 5 years project management experience or a formal project management qualification
 Systems development background
 Typically, a good degree in a numerate/computing discipline
 Verbal & written communication skills
 Typically received wide general management training covering team management, leadership skills and motivation

Tasks: Day to day management of project reporting to Project Manager & Project Board. Ensure comprehensive project, quality and risk plans are prepared and maintained. Ensure that problems are identified at the earliest opportunity and solutions are identified and implemented in line with the banks Change Control processes. Gain commitment from other Bank areas, and manage their progress/deliverables against the plan. Collect sign-offs from the project documentation, and from the Quality Control reviews.

Grade: This role would equate Project Management Level 7 (PRMG 7) using the BCS ISM3 model.

Position; **TEAM LEADER (TL1, TL2, TL4)**

Skill-set: Minimum 6 Years IT experience
 Typically a good degree or similar qualification
 Project planning experience
 Project implementation & rollout experience
 Experience of the full life cycle of system design, development & implementation with team leading experience of at least two of these Team management skills
 Trained in leadership skills and team motivation
 Communication skills
 Trained in eliciting user requirements
 Experienced in using RSD techniques
 Knowledge of at least two structured analysis/design methods or an in-depth knowledge of analysis and design techniques
 Experience in developing client-server systems
 Knowledge of quality processes

Additional Skills: **TL2** Architect/Designer skill-set
TL4 Experience of managing Test Team and system and implementation with extensive knowledge of regression testing and test automation techniques

Tasks:

TL1

Development Team Leader

General: Responsible for development workstreams and implementation reporting directly to the Project Leader. Prepare and maintain realistic workstream, quality and implementation plans. Leads the development team allocating and monitoring tasks.

TL2

Back End Team Leader

General: Co-ordinate all database design & development and all source systems leads changes. Additionally, a hands-on development role is undertaken.

Task Skills: C++, SQL Server, NT, database design & performance.

TL4

System Test Team Leader

General: Co-ordinate the test strategy, hands-on system testing, liaise with business to structure UAT, implementation strategy.

Task Skills: Testing Strategy & implementation. Migration strategy for upgrade to SQL Server V6.5, VB4.

Position: PROJECT CONSULTANT (PC)

Skill-set: Minimum 5 years IT experience
Familiar with the project development life-cycle
Trained in Project Management techniques
Qualified in Change Process Management, Configuration Management, Report Writing.

Tasks: Set up and maintain project management processes, procedures, tools and techniques. Produce planned and updated project and summary reports, including cost breakdowns and summaries. Provide tracked plans & financial documentation to the PSO & Project Manager. Help to produce and maintain project documentation, change records and risk register.

Grade: This role would equate to Project office Level 3 (PROF 3) using the BCS ISM3 model.

Position: ARCHITECT/DESIGNER (AD1, AD2)

Skill-set: Minimum 5 years IT experience
2 years experience in advanced database design & performance techniques
Expert in logical & physical database design and implementation
SQL Server 4.2 & 6.5 and SQL Server Tools experience
SQL Stored Procedure knowledge
2+ Years C/C++ programming experience
Experience in using RSD techniques
NT knowledge
Data loading experience

Additional Skills: AD2 Rules Based System Architecture experience

AD1 Task Skills: C++, SQL Server, NT, database design & performance

AD2 Task Skills: C++, SQL Server, NT, Rule-based design knowledge, database design & performance.

Position: ANALYST/PROGRAMMER (AP1, AP2, AP3, AP4, AP5, AP6)

Skill-set: Minimum 2 years IT experience
Visual Basic 3.0 & 4.0 programming and GUI design experience
2+ Years C/C++ programming experience
OLAP design and programming experience (ACUMEN)

Experience in Functional Analysis and analysis of user requirements
 Trained in database design, OO design techniques
 SQL Server 4.2 & 6.5 and SQL Server Tools experience
 SQL Stored Procedure knowledge
 Experienced in using RSD techniques
 NT knowledge & MS Access 2.0
 Business Objects query tool experience

Additional Skills:	AP4, AP5	Test Plan and implementation experience
AP1	Task Skills:	C++, SQL Server, NT, Rule-based design knowledge, database design & performance, OLAP design & development.
AP2	Task Skills:	C++, SQL Server, NT Rule-based design knowledge, database design & performance.
AP3	Task Skills:	ACUMEN, VB, SQL Server, NT database design & performance.
AP4 & AP5	General:	Testing all requirements. Preparation of test scripts and creation of test packs. First level investigation of problems (i.e. knowledge of system design and code required).
AP6	General:	System design & code knowledge across all requirements in order to provide full time support during warranty periods.
	Task Skills:	C++, VB, SQL Server, ACUMEN, NT, MS Access.

Grade: These roles would equate to Programming/Software Creation Level 3 (PROG 3) using the BCS ISM3 model.

Appendix B

AMID Project Requirements

AMID Thumbnail Sketch

The Advances Management information Datatbase (AMID) provides NatWest's Credit Strategy & policy department with the ability to analyse its lending book and so devise new and improved lending strategies. This client-server system is implemented on quadpentium NT servers with the client applications running on 486 PC's and Windows 3.1. AMID loads vast amounts of data from a variety of disparate systems and uses C++ and SQL to populate the databases. Primary data storage is through SQL Server, although because of the overall projected size of the database, on-line optical storage has been used to provide the necessary performance. The front-end provides the users with the ability to examine aggregated data through a of standard reports. By using multi-dimensional analysis tools (Acumen) and ad-hoc tools (Business Objects), the users are able to drill down or filter out unwanted data from the standard reports allowing them to focus on areas of particular interest. Both the multi-dimensional analysis functionality and standard reports are fronted by a GUI developed in Visual Basic. The problem of creating a consolidated view of the data loaded from the various source systems is addressed through the use of rules based technology. A tool has been developed, using Inference's ART*Enterprise, to allow the users to match records between source systems by employing exact and fuzzy matching techniques.

What is Needed

- Investigate and understand the existing AMID systems, referring to existing documentation.
- Analyse and consolidate written user requirements from a variety of sources, providing consultancy support, and liaising with business management.
- Produce software and database designs to meet these requirements, in accordance with Bank standards.
- Modify/enhance the existing software and database components in line with these designs, delivering additional components as required, again providing documentation in accordance with Bank standards.
- Test the modified/enhanced system in its entirety, matrix managing Bank user and IT staff as needed; and resolve all deviations from standards, design and requirements.
- Deliver the modified/enhanced system to meet Bank operational standards and provide support for an agreed warranty period.

- Project manage all the above.

Appendix C

Fee Tables as Supplied by Each Company

Aggregated Fee Rates for CMG (£)

PA Consulting Job Category	Code	Days	Total

The abbreviations shown after the position are used to identify the resources both in this document and in the Project plan.

Each position shows the following:

- required skill-set for the role including a guide to a BCS ISM3 grading for the job
- additional skills where needed for specific resources
- the specific skills to be used for those tasks

Position : **PROJECT LEADER (PL)**

Skill-set : 10+ Years IT experience
Minimum 5 years project management experience or a formal project management qualification
Systems development background
Typically, a good degree in a numerate/computing discipline
Verbal & written communication skills
Typically received wide general management training covering team management, leadership skills and motivation

Tasks: Day to day management of project reporting to Project Manager & Project Board. Ensure comprehensive project, quality and risk plans are prepared and maintained. Ensure that problems are identified at the earliest opportunity and solutions are identified and implemented in line with the Banks Change Control processes. Gain commitment from other Bank areas, and manage their progress/deliverables against the plan. Collect sign-offs from the project documentation, and from the Quality Control Reviews.

Grade : This role would equate Project Management Level 7 (PRMG 7) using the BCS ISM3 model.

Position : **TEAM LEADER (TL1, TL2, TL3, TL4)**

Skill-set : Minimum 6 Years IT experience
Typically a good degree or similar qualification
Project planning experience
Project implementation & rollout experience
Experience of the full life cycle of system design, development & implementation with team leading experience of at least two of these
Team management skills
Trained in leadership skills and team motivation
Communication skills

Trained in eliciting user requirements
Experienced in using RSD techniques
Knowledge of at least two structured analysis/design methods or an in-depth knowledge of analysis and design techniques
Experience in developing client-server systems
Knowledge of quality processes

Additional Skills :

- TL2** Architect/Designer skill-set
- TL3** Architect/Designer skill-set
- TL4** Experience of managing Test Team and system implementation with extensive knowledge of regression testing and test automation techniques

Tasks:

TL1 *Development Team Leader*

General: Responsible for development workstreams and implementation reporting directly to the Project Leader. Prepare and maintain realistic workstream, quality and implementation plans. Leads the development team allocating and monitoring tasks.

TL2 *Back End Team Leader*

General: Co-ordinate all database design & development and all source system loads changes. Additionally, a hands-on development role is undertaken.

Task Skills: C++, SQL Server, NT, database design & performance.

TL3 *Front End Team Leader*

General : Co-ordinate all reporting front end and hands-on design and development of the AdHoc changes.

Task Skills: C++, VB, Business Objects, SQL Server, stored procedures, NT, database design & performance.

TL4 *System Test Team Leader*

General: Co-ordinate the test strategy, hands-on system testing, liaise with business to structure UAT, implementation strategy.

Task Skills: Testing strategy & implementation. Migration strategy for upgrade to SQLServer v6.5, VB 4.

Grade : TL1 would equate to Project Management Level 5 or 6 (PRMG 5/6) using the BCS ISM3 model.

TL2, TL3, TL4 roles include both management and hands-on development. Grades would be equivalent to Project Management Level 4 or 5 (PRMG 4/5) and Programming/Software Creation level 4 (PROG 4)

Position : **PROJECT CONSULTANT (PC)**

Skill-set : Minimum 5 years IT experience
Familiar with the project development life-cycle
Trained in Project Management techniques
Qualified in Change Process Management, Configuration Management, Report Writing.

Tasks: Set up and maintain project management processes, procedures, tools and techniques. Produce planned and updated project and summary reports, including cost breakdowns and summaries. Provide tracked plans & financial documentation to the PSO & Project Manager. Help to produce and maintain project documentation, change records and risk register.

Grade : This role would equate to Project Office Level 3 (PROF 3) using the BCS ISM3 model.

Position : **ARCHITECT/DESIGNER (AD1, AD2)**

Skill-set : Minimum 5 years IT experience
2 years experience in advanced database design & performance techniques.
Expert in logical & physical database design and implementation
SQL Server 4.2 & 6.5 and SQL Server Tools experience
SQL Stored Procedure knowledge
2+ Years C/C++ programming experience
Experienced in using RSD techniques
NT knowledge
Data loading experience

Additional Skills : **AD2** Rules Based System Architecture experience.

AD1 Task Skills: C++, SQL Server, NT, databasc design & performance.

AD2 Task Skills: C++, SQL Server, NT, Rule-based design knowledge, database design & performance.

Grade : These roles would equate to Programming/Software Creation Level 4 (PROG 4) using thc BCS ISM3 model.

Position : ANALYST/PROGRAMMER (AP1, AP2, AP3, AP4, AP5, AP6)

Skill-set : Minimum 2 years IT experience
Visual Basic 3.0 & 4.0 programming and GUI design experience
2+ Years C/C++ programming experience
OLAP design and programming experience (ACUMEN)
Experience in Functional Analysis and analysis of user requirements
Trained in database design, OO design techniques
SQL Server 4.2 & 6.5 and SQL Server Tools experience
SQL Stored Procedure knowledge
Experienced in using RSD techniques
NT knowledge & MS Access 2.0
Business Objects query tool experience

Additional Skills : AP4, AP5 Test Plan and implementation experience.

AP1 Task Skills: C++, SQL Server, NT, Rule-based design knowledge, database design & performance, OLAP design & development.

AP2 Task Skills: C++, SQL Server, NT, Rule-based design knowledge, database design & performance.

AP3 Task Skills: ACUMEN, VB, SQL Server, NT, database design & performance.

AP4 & AP5 General: Testing across all requirements. Preparation of test scripts and creation of test packs. First level investigation of problems (i.e. knowledge of system design and code required)

AP6 General: System design & code knowledge across all requirements in order to provide full time support during warranty periods

Task Skills: C++, VB, SQL Server, ACUMEN, NT, MS Access.

Grade : These roles would equate to Programming/Software Creation Level 3 (PROG 3) using the BCS ISM3 model.

REPORT PLANNING FORM

Project Code: ???	Title: Systems and Software Opportunities in Personal Computers, 1993-1998
-------------------	--

Section: I. Introduction		Pages: 7		
Subsection:	Source: _____ Content	# Exhibits	# Text	TOTAL
A. Description—	Outlines the objectives pursued in producing			
objectives, audience,	the report, e.g.:		1 1/2	1 1/2
uses	<ul style="list-style-type: none"> • identify areas of business where personal 			
	computer developments affect the IT markets			
	<ul style="list-style-type: none"> • provide an overview of equipment and 			
	software opportunities			
	<ul style="list-style-type: none"> • defines it as one of the MAPs program reports 			
	<ul style="list-style-type: none"> • describes the audience it is intended for and the uses for it 			
B. Scope	Describes the coverage of the report, e.g.:		1 1/2	1 1/2
	<ul style="list-style-type: none"> • application and systems software products 			
	<ul style="list-style-type: none"> • personal computer systems 			
	- U.S. markets only, 1992-1997			
	<ul style="list-style-type: none"> • discusses the issues addressed, e.g.: the 			
	impact of new operating systems			
C. Methodology	Describes the research, e.g.:	1	1	2
	<ul style="list-style-type: none"> • user interviews by category 			
	<ul style="list-style-type: none"> • vendor interviews by category 			
	<ul style="list-style-type: none"> • library references by category 			
	<ul style="list-style-type: none"> • INPUT reports used by name 			
	<ul style="list-style-type: none"> • similar “how to read and use” comments 			
	Describes analysis and forecasts preparation		1	1
	<ul style="list-style-type: none"> • assumptions 			
	<ul style="list-style-type: none"> • use of vendor revenue 			
	<ul style="list-style-type: none"> • adjustment for channels 			
	<ul style="list-style-type: none"> • forecast presentation (current, \$, rounded to nearest million) 		1	1

INDEPENDENT CONSULTING SERVICE AGREEMENT

EXHIBIT A

I. CONSULTANT INFORMATION

Name:

Address:

Telephone:

NI No.:

II. PROJECT INFORMATION

Project Manager:

Project Name:

Code:

Agreement Date:

From:

To:

Exhibit Date:

From:

To:

Replaces Exhibit A: (If Applicable)

III. TASK DESCRIPTION

List and number project tasks and specify in detail the exact scope of the tasks. Attach project specifications, interview forms, etc.

IV. REVIEW OF PROGRESS:

List task numbers and/or dates review of progress will be performed.

V. DELIVERABLES/DUE DATES/FEEES:

List task numbers, date due and fees for each task.

VI. PAYMENT SCHEDULE:

List task numbers, invoice due date, and scheduled invoice payment date.

VII. REIMBURSABLE EXPENSES

List type of expenses and maximum amount to be reimbursed. INPUT Travel Authorisation and Expense Report forms to be attached.

VIII. AUTHORISATIONS

Signed: _____

Contractor:
(Print Name) _____

Date: _____

Signed: _____

INPUT:
(Print Name) _____

Date: _____

PLEASE REMIT INVOICES TO: INPUT, ATTENTION: (ABOVE NAMED PROJECT MANAGER)

CONTRACTOR INSTRUCTIONS:

This independent Consulting Services Agreement is not valid until an authorised Requisition by the President is on file and the Agreement is signed by the President.

The Agreement must include an Exhibit A specifying in detail the work to be performed.

All work must be prepared and submitted in INPUT's style and format. Examples and policies may be attached to this Agreement and must be returned to the company prior to final invoice payment.

All work must be submitted for review according to the schedule set out in IV. Review of Progress.

All work must be submitted according to the schedule set out in V. Deliverables/Due Dates/Fees. If the schedule cannot be met the project manager must be informed and a new schedule set.

Invoices must be submitted to the project Manager according to VI. Payment Schedule in order for payment to be made on the scheduled dates.

- An invoice must be submitted, on contractor's formal letterhead/invoice form.
- The project code must be referenced on the invoice and the payment due must be in accordance with payment schedule of the Exhibit A.
- Expenses must be listed separately on the invoice and completed INPUT Expense Report form with attached receipts must be attached to the invoice.
- Only pre-authorized travel expenses, incurred visiting INPUT client/business contacts to perform a project will be reimbursed
- Copying and postage should be arranged to be done in an INPUT office where possible.
- All expenses are reimbursed at cost.
- Advance payment of any fees is not permitted.
- Payment is contingent upon satisfactory completion of all work submitted, in INPUT style and format, according to the specifications and schedules in the Exhibit A, and the return of all INPUT materials prior to submission of the final invoice.
- Payment is normally scheduled to be paid within 7 to 10 working days after submission of the invoice to the project manager for approval.
- * All contracts and invoices must include the contractor's Tax Identification number for reporting to taxation authorities.

Car Mileage rate for the use of an employee's private car on company business is as follows:

Car Engine Size	Rate
up to 1000cc	27p/mile
up to 1500cc	34p/mile
up to 2000cc	43p/mile
over 2000cc	60p/mile
