INPUT

About INPUT

INPUT provides planning information, analysis, and recommendations to managers and executives in the information processing industries. Through market research, technology forecasting, and competitive analysis, INPUT supports client management in making informed decisions. Continuing services are provided to users and vendors of computers, communications, and office products and services.

The company carries out continuous and in-depth research. Working closely with clients on important issues, INPUT's staff members analyze and interpret the research data, then develop recommendations and innovative ideas to meet clients' needs.

Clients receive reports, presentations, access to data on which analyses are based, and continuous consulting.

Many of INPUT's professional staff members have nearly 20 years' experience in their areas of specialization. Most have held senior management positions in operations, marketing, or planning. This expertise enables INPUT to supply practical solutions to complex business problems.

Formed in 1974, INPUT has become a leading international planning services firm. Clients include over 100 of the world's largest and most technically advanced companies.

I INTRODUCTION

I INTRODUCTION

A. USING THE DIRECTORY

- This Directory of U.S. Third-Party Maintenance suppliers was compiled by INPUT from the library of U.S. service vendors in the following manner. Each known service supplier was contacted by telephone to ascertain if it supplied TPM services and, if so:
 - The product mix serviced.
 - The brands of equipment serviced.
 - The geographic coverage.
 - The company size (number of field engineers).

- This data is provided for active companies only and excludes companies that use answering machines. The original alphabetical list used is given in Section I.B., but care should be used in referencing a company in this list. Companies referenced fall into three categories:
 - Active, ongoing service businesses with full-time staff, company offices, and operations.

- Semi-active companies in the start-up phase.
- Dormant companies that maintain they are in business but offer only answering service/machine contact to the outside world.
- Profiles of the active TPM companies have been provided in Chapter II of this volume, and for all practical purposes they are the only current TPM vendors operating in the U.S. market today. Details on their markets, operations, competition, strategies, goals, and other data are analyzed in Volume I.
- INPUT has employed its best efforts in ascertaining the validity of the information contained in this volume, but it does not guarantee the accuracy of completeness of same. Clients may obtain referrals to any of the companies referenced here by contacting the INPUT hotline.
