Abstract

This report presents of data relating user perceptions of vendor service performance and user satisfaction with the servicing of large systems.

The data presented in this report has been collected by INPUT during the first half of 1990 in a survey of computer users in the following countries:

- · Belgium
- France
- · Germany
- Italy
- · The Netherlands
- Norway
- Spain
- Sweden
- · The United Kingdom

This report contains 132 pages including 135 exhibits.

Introduction

Introduction

<u>A</u>	
Objectives and Scope	This INPUT 1990 report on user requirements for customer service in Western Europe presents the large systems computer user's view of many aspects of computer system service and support.
	The report is intended to enable service vendors to assess the service performance levels achieved by their organisations in 1990. Data, which relates to user perception of major vendor service performance, is presented in simple tabulated form. Trends relating to service performance can be assessed by comparing the data contained in this report with previous INPUT Annual Reports.
в	The report also contains tabulated data relating to Western Europe overall and nine individual European country markets to enable vendors to compare their performance with overall mean values of Western Euro- pean vendor performance and assess the characteristics of individual country markets.
Methodology	
	The data presented in this report was compiled from interviews with 324 large systems computer users throughout Western Europe. Users were chosen at random and interviewed by telephone in their native language when necessary. The basis of user interviews was a questionnaire relating to over 100 aspects of service and support, compiled from discussions with major service vendors. A copy of the user questionnaire is included as Appendix A.
	Details of the user sample analysed in this report are given in Exhibits I-1 and I-2.

Report Structure	The remaining chapters of this report are structured as follows:
	 Chapter II explains the basis of the statistics, the correct method of interpretation and ways of doing simple comparisons.
	 Chapter III contains tabulated data and mean values relating to user perception of service performance overall in Western Europe and nine individual European country markets.
	 Chapter IV contains tabulated data relating to user perception of major equipment vendors' service performance.
	Appendix A contains the questionnaire used for user interviews.

CEUSF

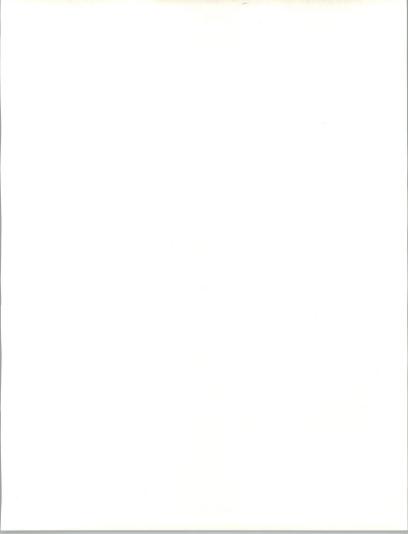

Interpretation of the Data

Interpretation of the Data

A	
Definitions	Hardware: any computer system or peripheral system
	Software: operating systems software, NOT applications
	 Large system: a system that is considered by the vendor part of that vendor's large system product range—for example IBM 309X and 308X, Bull DPS 8, or Digital VAX 8XXX.
	 Medium System: a system that is considered by the vendor part of that vendor's medium system product range—for example IBM 43XX and AS/400, Bull DPS 7, or Digital VAX 6XXX.
	 Small system: a system that is considered by the vendor part of that vendor's small system product range—for example IBM S34 and S36, Bull DPS6 or Digital Microvax.
	 Documentation: user documentation, provided by the product vendor, which relates to operation and use of the computer system hardware or systems software.
	 Standard Error: (of the mean) is the standard deviation (SD) of the sample divided by the square root of the sample size.
В	
Statistics	Mean values are used throughout the tabulated data presented in this report. These mean values refer to either the mean value of user sample ratings for specific aspects of service performance, or to the overall mean value for a range of service performance factors. In either case the mean value calculation is weighted according to the number of user responses recorded.

INPUT

	The standard error for each set of tabulated data has been estimated and is included in each exhibit within the report. In 1990, INPUT's user interview programme included interviews with users of large, medium and small systems—a total of 1,211 interviews. Calculation of standard error presented in this report is based on the estimated standard devia- tions that relate to this total sample. For example, the standard deviation of user satisfaction with hardware service is estimated to be 2.2 for the total sample of 1,211 interviews. Therefore, the related standard error would be 2.2 divided by the square root of the sample size (2.2 divided by '1211), giving a standard error of 0.06. For smaller sample sizes, for example the overall results obtained from interviews with 324 large systems users, the standard error would increase to 0.1 as a consequence of reduced sample size. In analysing the data presented in this report, INPUT has carefully scanned all the answers given during the interviews; when these answers were considered to be a gross departure from the norm, the data has been discounted. The objective of this exercise was to eliminate the worst effects of skew on distributions due to gross distortions. Statistically, small sample sizes create difficulties due to the fact that they may not be totally representative of the population they represent. Although in the interests of completeness INPUT has included data relating to small sample, since these form part of a larger overall vendor
	sample, caution is recommended in assessing data from these small samples. INPUT has chosen a minimum sample size of 20 to represent a reasonably valid statistical result.
<u>C</u>	
Ratings and Satisfaction Index	In this report, ratings for importance and satisfaction are on a scale of 0 to 10 where:
	• Importance
	 0 = of no importance whatsoever 5 = of average importance 10 = extremely important
	Satisfaction
	 0 = total and absolute dissatisfaction 5 = average satisfaction -10 = total satisfaction

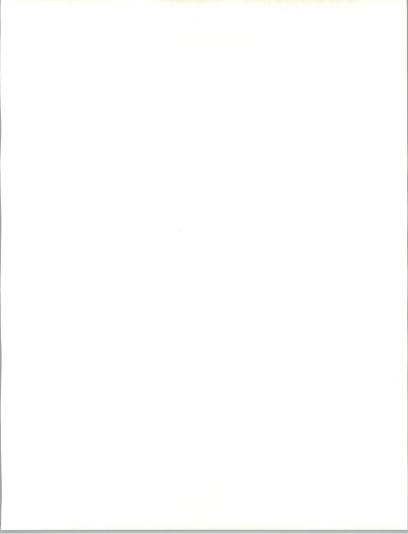

.

The satisfaction index throughout this report is based on the difference between the importance and satisfaction ratings for specific aspects of service. The questions concerning importance and satisfaction were asked at the same time and the answers therefore reflect the respondent's value judgement at that time.

- Ratings of 10 and 10, or 6 and 6, etc., give a difference value of zero, indicating that the importance needs are fully satisfied.
- Ratings of importance 8 and satisfaction 9 would indicate overfulfillment of the importance needs, and would give a satisfaction index of -1. In INPUT's analysis an overfulfillment of -1 is represented as (1).
- Ratings of importance 6 and satisfaction 5 indicate underfulfillment of the importance needs and would give a satisfaction index of 1, the degree of underfulfillment being related to the magnitude of this difference.
- · Satisfaction index can thus be interpreted as follows:
 - (1) = overfulfilled or oversatisfied
 - 0 = completely satisfied
 - 1 = concerns and worries
 - 2 = real dissatisfaction
 - 3 = pain level

Appendix

User Questionnaire

Α					
Ger	leral				
1.	What is the make and model number of the main computer on your site and how many do you have?				
	Make				
	Model (CRITICAL INFORMATION)				
	Units				
2.	Are you the person who is knowledgeable on the servicing of this system?				
	(If not then obtain the name of the correct person and start again.)				
	Name of person responsible				
3.	Do you have another system? What is the make and model number of that system and how many do you have?				
	Make				
	Model (CRITICAL INFORMATION)				
	Units				
	All of the following questions that I am going to ask you are related to your				
	(To confirm, read out the make and model number.)				

4 So that we can ensure that we get a proper cross-section of industry and commerce, can you tell me what is the main business sector of your company? (Read out the list-to allow for best choice. Then circle appropriate answer.)

Business sector

 Manufacturing 	1
 Distribution 	2
 Transportation 	3
Utilities	4
 Banking and Finance 	5

- · Banking and Finance
- Insurance Government
- Services
- 8 · Other/Don't Know 9

B

Service Vendor Selection

I would like to ask you some questions relating to the vendor that services your computer system.

5. Could you please rate the importance of the following criteria in selecting your service vendor, on a scale of 0 to 10 (0 = low, 10 = high).

	Criteria	Rating
a.	Price	
b.	Quality of service	
c.	Guaranteed system availability level	
d.	Guaranteed availability of spare parts	
e.	Technical expertise	
f.	Fast response time	
g.	Availability of software support	
ĥ.	Ability to provide other services	
i.	Contract flexibility	
j.	Ability to service other products	
k.	Vendor reputation	

6

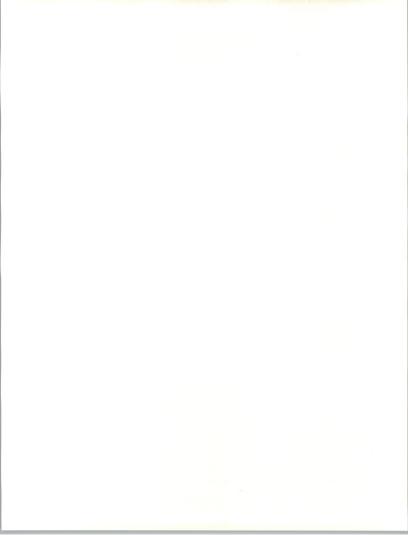

7

Would you please tell me who services your computer system hardware? (Remind the user 6a. system.)

(Please circle appropriate vendor type; multiple answers are allowed.)

Manufacturer	1
Dealer/distributor	1
Third-party maintenance company	1
Own company	1
Other	1

(If the respondent answered YES to third-party maintenance, ask the following question. If not, go to question 7.)

6b. I notice that your system, or part of it, is serviced by a third-party maintenance company. Could you tell me the reason why you use third-party maintenance?

(Please circle appropriate answer; multiple answers allowed.)

- Lower cost
 1

 Local service
 1

 Single-source service
 1

 TPM service higher quality
 1

 More flexible contract
 1

 Other/Don't know
 9
- 7a. I notice that you do not use a third-party maintenance company; is there a reason for this?

(Please circle appropriate answer; multiple answers allowed.)

7b. Assuming you were approached by a TPM company, at what level of price reduction would you consider using a TPM vendor to service your computer hardware?

(Please circle appropriate answer. Only one answer allowed.)

- · 1% 10% 1 · 11% - 20% 1 · 21% - 30% 1 · 31% - 40% 1 41% - 50% 1 50%+ 1 · Unwilling at any price 1 · Other/Don't know 9
- How important is it that your service vendor communicates with you regularly and effectively to advise you of, for example:

The status of your system	>	
Possible problems	>	
Repair plans	>	INTERVIEWER
Availability of spare parts	>	PROMPTS
Routine visits	>	
Hardware and software changes	>	

Could you please provide an importance and satisfaction rating on a scale of 0 to 10, where 0 is of no importance or indicates total dissatisfaction, and 10 is at top importance or indicates that you are fully satisfied.

- Importance _____
- Satisfaction _____
- 9a. Would you prefer all hardware maintenance and software support to be provided by one service vendor at each site? If yes, what would your interest level be?

Level of interest: (please circle)

Low Medium High

(Circle answer.)

Yes 1 No 1 Don't know 9

(If the respondent answered YES, ask:)

9b. Who would you prefer that vendor to be?

(Please circle appropriate answer; multiple answers allowed.)

· The manufacturer of your main hardware	1
 Dealer/distributor/VAR 	1
 TPM company 	1
 One of your hardware manufacturers 	1
 Don't know/other 	9

Note: VAR is a value-added reseller.

С

Hardware Maintenance

I would now like to ask you some questions about the hardware maintenance of your computer system. (Reaffirm the system type _____)

Some of the questions are scaled with ratings from 0 to 10. Zero (0) represents zero importance or satisfaction, 5 is average, and 10 represents top importance or full satisfaction.

- 10. What is your rating for the importance of hardware maintenance to your business and how satisfied are you with your service vendor's performance?
 - Importance rating _____
 - Satisfaction rating _____

- 11. If we define systems availability as the percentage of your normal working hours that the system is operational (disregarding non-critical peripheral breaks), what percentage has that been for your system over the last twelve months?
 - Percentage _____%
- 12. How many times each year does your system fail completely for a period of greater than one hour?
 - Per year ______

And what percentage of these system failures are due to:

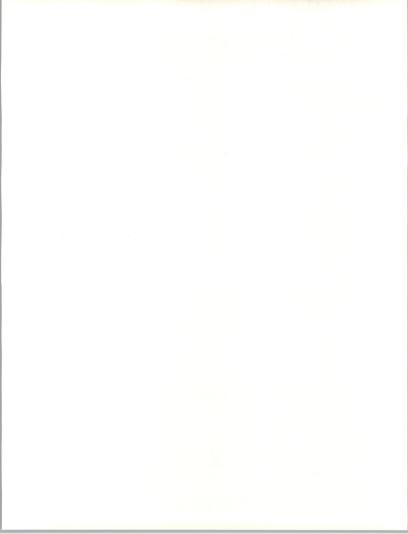

Hardware	%
Systems software	%
Applications software	%
Other (i.e., power failure)	%

(Please check that percentages add up to 100.)

- 13. What is your rating for the importance of systems availability (scale 0 10), and what is your level of satisfaction?
 - Importance rating
 - Satisfaction rating
- 14. Defining hardware response time as the time it takes between reporting a fault and the arrival of the service engineer on site (in working hours, that is to say 8 hours = 1 working day), what response time (in hours) do you find acceptable and what did you actually experience as an average over the last twelve months?
 - Acceptable _____ Hours
 - Experienced Hours
- 15. If repair time is defined as the time taken to get the system fully operational from the time the engineer arrives on site, then what time do you find acceptable (in working hours) and what time did you experience in the last twelve months?

(Note: 8 hours = 1 working day/shift)

- Acceptable _____Hours
- Experienced _____Hours

 I would now like to go through a list of five aspects of hardware maintenance and ask you to give an importance and satisfaction rating for each (scale 0 - 10).

	Importance	Satisfaction
 Spares availability 		
 Engineer skills 		
 Problem escalation 		
 Documentation 		
 Remote diagnostics 		

- How important is it that your system supplier provides a hardware consultancy/planning service to support your operations and how satisfied are you with the service provided? (Scale 0 - 10)
 - Importance _____
 - Satisfaction _____
- 18. If possible, I would like you to provide some information on hardware maintenance pricing.
 - a. What percentage price increase or decrease did you pay for hardware maintenance in the year 1989?
 - Increase _____%
 - Decrease _____%
 - No change 1 (circle)
 - b. What do you expect the price changes for hardware maintenance to be in thefuture, in percentage terms per annum?
 - Increase ____%
 - Decrease ____%
 - No change 1 (circle)
 - c. How important do you rate hardware maintenance pricing and how satisfied are you with the price you currently pay? (Scale 0 - 10)

 - Satisfaction rating _____

19. Which type of hardware maintenance contract do you currently have on the main part of your system?

(Please circle appropriate answer; only one answer allowed.)

- Warranty
- Three-year
- One-year
- · Time and materials 1
- None

D

Software Support

I would like to ask you some questions relating to the service you get from your software support vendor.

These questions relate to systems software-not applications.

1

1

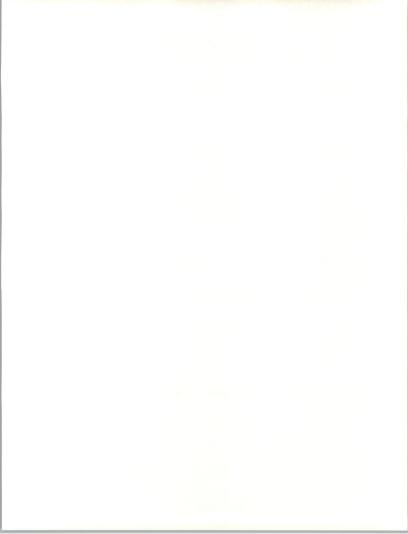

As before, some of the questions are scaled with ratings from 0 to 10. Zero (0) represents zero importance or satisfaction, 5 is average and 10 is top importance or full satisfaction.

20. Who supports your systems software?

(Please circle appropriate answer; multiple answers allowed.)

 Hardware manufacturer 	1
 Software house 	1
 Software product vendor 	1
 Value-added reseller (VAR) 	1
In-house	1
 Other/Don't know 	9

- What is your rating for the importance of systems software support to your business and what is your satisfaction with your vendor's systems support activities? (Scale 0 - 10)
 - Importance rating _____
 - Satisfaction rating _____
- 22. What percentage of systems software problems are solved by telephone, and how long does this take in elapsed time from the time it is alerted to the service engineer?
 - Solved by phone ____%
 - Elapsed time _____ Hours

- 23 For those problems not possible to solve over the telephone, what response time would you find acceptable, and what time (on average and in working hours) have you experienced over the last twelve months? (Take response time to mean from the time the problem is reported to the arrival of the engineer on site.)
 - Acceptable _____ Hours
 Experienced Hours
- 24 If fix time is defined as the time taken to get the system fully operational from the arrival of the engineer on site, then what time (in working hours) do you find acceptable, and what did you experience over the last twelve months?
 - Acceptable _____ Hours
 Experienced Hours
- 25. I would like to go through a list of five aspects of systems software support and ask you to give an importance and a satisfaction rating for each. (Scale 0 - 10)

	Importance	Satisfaction
 Engineer skills Documentation 		
 Software installation 		
· Provision of updates		
 Remote diagnostics 		

- 26. How important is it that your system supplier provides a systems software consultancy/ planning service to support your operations and how satisfied are you with the service provided? (Scale 0 - 10)
 - Importance rating _____
 - Satisfaction rating
- 27. If possible I would like you to provide some information on systems software support pricing.
 - a. What percentage price increase or decrease did you pay for systems software support in the year 1989?
 - Increase %
 - Decrease
 %
 - No change 1 (circle)

- b. What do you expect the price changes for systems software support to be in the future, in percentage terms per annum?
- Increase 9
- Decrease
- No change 1 (circle)
- c. How important do you rate systems software support pricing and how satisfied are you with the price you currently pay? (Scale 0 - 10)
- Importance rating
- Satisfaction rating _____
- 28. Which type of systems software support contract do you currently have?

(Please circle appropriate answer. Only one answer allowed.)

٠	Support included in software license fee	1
٠	Three-year contract	1
٠	One-year contract	1
٠	Ad hoc	1
٠	None	1

E

Other Services

29 To conclude this questionnaire, I am particularly interested in obtaining your views on other services or modified current service offerings that your service suppliers could provide that would help to improve the running of your computer systems.

Could you say which of the following services your service vendor is currently contracted to supply and which you would like your service vendor to provide? Also, could you give a level of interest rating against each in the range 0 to 10, where $0 = n_0$ interest, $5 = a_{verage}$ interest and 10 = must have?

(Please circle appropriate answer and give LOI rating.)

	Currently Contracted	Require	LOI
 Configuration planning 	1	1	
 Capacity planning 	1	1	
 Environmental planning 	1	1	
Cabling	1	1	
 Software evaluation 	1	1	
 Consultancy 	1	1	
 Network planning 	1	1	

INPUT

29. (cont.)

	Currently Contracted	Require	LOI
 Network management 	1	1	
 Disaster recovery 	1	1	
 Facilities management 	1	1	
 Problems management 	1	1	
 Applications software support 	1	1	

These last questions complete the questionnaire. I would like to thank you on behalf of INPUT for helping us to complete this survey. To express our appreciation for your time we will be sending you a "thank you" package containing a summary of the results from our survey.

Again, thank you for your time.
